ABSTRACT

In a golf ball comprising a core and a cover of at

least one layer enclosing the core, at least one layer of the
cover is formed of a resin composition comprising as
essential components, (a) a component selected from the group
consisting of an olefin-unsaturated carboxylic acid copolymer,
an olefin-unsaturated carboxylic acid-unsaturated carboxylic

acid ester copolymer, and metal ion-neutralized products of
these copolymers, and (b) a binary copolymer consisting of a
polyolefin component and a polyamide component.
